ABOUT ME

In development for 3 years. 3rd-year university student. I am planning to continue studying and working in backend development. I develop solutions in various languages, including Java, .NET and JavaScript – backend, REST API, working with databases, etc. As part of my studies, I have experience in writing various software solutions such as websites, desktop applications, games, mobile applications. I have worked with UML design, Docker deployment, prototyping in Figma. Weaknesses – frontend, design, communication skills.

EDUCATION

ACADEMIC LYCEUM №5 | 2011-2020

Basic secondary education

CIST KNEU named after V. HETMAN | 2020-2024

Professional Junior Bachelor
